Professional Summary

Mobile Engineer specializing in the **Dart/Flutter** ecosystem with a strong focus on **Clean Architecture** and **Functional Programming (FPdart)**. Expert in designing infrastructure-decoupled systems that allow seamless migrations between backends (Supabase vs. REST API). I excel at integrating **DevOps** culture into mobile development (Docker/Makefiles).

Technical Skills

- **Core:** Flutter (Expert), Dart, Clean Architecture, MVVM, SOLID, FPdart.
 - **State Management:** BLoC (Specialist), RxDart, Provider, GetIt (DI).
 - **Backend & Data:** Supabase (Auth, Realtime, Functions), PostgreSQL, REST APIs (Dio), SQL.
 - **DevOps & QA:** Docker, Makefile Scripting, Git Hooks, Unit/Integration/Widget Testing.
 - **UI/UX:** FL Chart, Figma (Technical Collaboration).
 - **Security:** JWT, Secure Storage, App Hardening.
-

Professional Experience

Senior Mobile Engineer (Freelance) | IDUCDEV

July 2025 – Present | Remote

- **SereniFlu (Wellness MVP)**: Architected a modular, interface-driven system that allows real-time backend swapping via configuration.
- Implemented an emotional mapping engine with **94% accuracy** and complex longitudinal trend visualization.
- Developed an automation suite using **Makefiles and Docker** that reduced local environment setup time by 50%.
- Integrated **Supabase Realtime** for instant data synchronization and low-latency mobile performance.

Frontend Developer | Municipality of Buchivacoa

February 2025 – June 2025 | Venezuela

- Boosted page load performance by **40%** by implementing Server-Side Rendering (SSR) with Next.js.
- Developed 8+ critical interfaces optimized for high concurrency in government digital services.
- Established frontend style guides and coding standards that increased code maintainability by 25%.

Frontend & Mobile Developer | No Country

January 2023 – January 2025 | Remote

- Led the development of 7+ cross-platform solutions using React, TypeScript, and Flutter.
- Achieved a **98% Lighthouse Accessibility score** on key projects, exceeding industry benchmarks.
- Reduced API response times by **35%** through strategic caching, code-splitting, and payload optimization.

Education

- **B.S. in Systems Engineering** | Universidad Nacional Abierta (Ongoing, since 2023)

Featured Projects

- **SereniFlu:** AI-driven emotional companion with advanced encryption and predictive mental health trends. sereniflu.netlify.app
 - **Temporus:** Cross-platform time-tracker for social media with multi-device sync. www.temporus.site
-

Languages

- **Spanish:** Native
- **English:** Intermediate (B1 - Actively studying for B2/C1 proficiency)
