Professional Summary

Flutter Engineer with **1 year of specialized experience in Flutter and 3+ years in software development**, starting in web frontend (React/Next.js) and transitioning to the **Dart/Flutter** ecosystem in 2025. Expert in **Clean Architecture** and **Functional Programming (FPdart)**. I specialize in designing infrastructure-decoupled systems that enable seamless backend migrations (Supabase/REST API). I bring **DevOps** culture into mobile development (Docker, Makefiles, CI/CD) to reduce setup and delivery times.

Technical Skills

- **Core:** Flutter (Expert), Dart, Clean Architecture, MVVM, SOLID, FPdart.
 - **State Management:** BLoC (Specialist), RxDart, Provider, GetIt.
 - **Backend & Data:** Supabase (Auth, Realtime, Functions), PostgreSQL, REST APIs (Dio), WebSockets, SQL.
 - **DevOps & Infrastructure:** Docker & Docker Compose, Dokploy, n8n, GitHub Actions, SSH, Bash Scripting, Makefile, Git Hooks.
 - **QA:** Unit/Integration/Widget Testing.
 - **UI/UX:** FL Chart, Figma (Technical Collaboration).
-

Professional Experience

Mobile Engineer (Freelance) | IDUCDEV

July 2025 – Present / Remote - Architected a modular, interface-driven system for **SereniFlu** allowing real-time backend swapping via configuration. - Implemented an emotional mapping engine with **94% accuracy** and longitudinal trend analysis. - Developed an automation suite using **Makefiles and Docker** that reduced environment setup time by 50%. - Integrated **Supabase Realtime** for instant data sync and shipped 3+ production-ready Flutter apps.

Frontend Developer | Municipality of Buchivacoa

February 2025 – June 2025 / Venezuela - Boosted page load performance by **40%** by implementing SSR with Next.js. - Developed 8+ critical interfaces optimized for high concurrency in government digital services. - Established frontend style guides and coding standards that increased maintainability by 25%.

Frontend & Mobile Developer | No Country

January 2023 – January 2025 / Remote - Led the development of 7+ cross-platform solutions using React, TypeScript, and Flutter. - Achieved a **98% Lighthouse Accessibility score** on key projects, exceeding industry benchmarks. - Reduced API response times by **35%** through strategic caching, code-splitting, and payload optimization.

Education

- **B.S. in Systems Engineering** | Universidad Nacional Abierta, Venezuela (Ongoing, since 2023)
-

Featured Projects

- **SereniFlu:** Flutter wellness app with <30s emotional check-ins and AI-driven recommendations. sereniflu.netlify.app
 - **Temporus:** Cross-platform time-tracking app with multi-device real-time sync. www.temporus.site
 - **Juego PPT:** Real-time rock-paper-scissors multiplayer platform using WebSockets. juegoppt.site
 - **VisDown:** Online video downloader built with Next.js and TypeScript.
 - **Automation Server:** Self-hosted infrastructure with n8n, Docker, and Dokploy for automated workflows.
-

Languages

- **Spanish:** Native
- **English:** Intermediate (B1 - Actively studying for B2/C1 proficiency)
